KAWA cheat sheet

POCKET TRACKER · M-VAVE FM-1 · FIRMWARE 0.8 BETA

THE BASICS

SELECT	turns the pages of EDIT, LFO, ENV, FX, GLO · elsewhere: the row / step page / menu
ALGORITHM	the track · SONG: the entry · GROOVE: the step · OPTIONS: the metronome
PRESETS	SOUND 1: the factory sound · elsewhere: the page's cursor or the pattern
K1 – K4	red, yellow, green, blue · the bottom line always says what they do
a button again	the next page of its group (EDIT, LFO, ENV, SCL, GLO, FX)
OCT- OCT+	the keys' octave · other pages: size, add/remove, OK/back

HOLDS a yellow bar fills first

HOME HOLD	the help of the page you are on
HOME HOLD + PLAY	PANIC: everything stops and cuts
FX HOLD	LIVE effects, for as long as you hold it
SAVE HOLD	the tools: OPTIONS, UNDO, REDO, CLEAR, COPY, PASTE, RANDOM
SAVE HOLD + OCT- / OCT+	UNDO / REDO, at once
REC HOLD + **SELECT**	rows the cursor jumps after a note (0–16)

SHORTCUTS

SAVE OCT+	save the song again, in its slot
OCT- / OCT+ *(GRID)*	the pattern's size: 16, 32, 64 steps
OCT+ / OCT- *(a sound in gold)*	load the factory sound shown / keep yours
ARP HOLD + **PRESETS**	SOUND: next / previous engine
ARP HOLD + K3 / K4	the cell's second effect
ARP tap	clear what is under the cursor

THE ARP KEY clear / shift, not an arpeggiator

TRACKS	tap: clear cell · held+SELECT/ALGO: insert / remove a row
GRID	a step held + ARP: clears it
SOUND	held + PRESETS: next / previous engine
SONG	switches LOOP ⇄ SONG
LIVE	clears the LIVE lane
MIX	held + a black key: solo that track

KEYS white / black, per page

GRID	16 steps on / off · black: the track
MAGIC	the 16 tools · black: the track
LIVE	the bank's effects · black: mute tracks
MIX	play the track · black: mute · ARP held: solo
SONG / GROOVE / PROJECTS	the entry's pattern (or "+") / the step / the slot
KIT, sliced SAMPLE	black keys play too: the neighbour, an octave up

SOUND ENGINES

PULSE	12/25/50/75% or PWM, NES-style
WAVE	8 Game Boy-style 4-bit waves
NOISE	LONG or METAL, tuned by the note
FM	6 operators, 32 algorithms · one track at a time
KIT	16 drums, 8 kits
SAMPLE	a break in 16 slices, or your own sound

THE PAGES OF A SOUND

EDIT	SOUND · SOUND 2 · OPERATOR + OP ENV (FM) or SAMPLE EDIT · EFFECT · TABLE
LFO	LFO · MODULATION
ENV	ENVELOPE (ADSR) · MIX (levels, pan, sends, master)
a sound you edited	a star after its name · PRESETS shows the next in gold
one track, or all?	EFFECT = this track · MIX past track 6 (column M) = master

SENDS & LIVE FX button

FX tap	SENDS: each track's DRIVE, ECHO, REVERB (0–15)
FX again	LIVE: 32 effects on the white keys · a third tap goes back
OCT+ *(LIVE)*	the WRECK bank (filters, freeze, distort, vinyl…)
K4 *(LIVE)*	the target: MASTER, or one track
black keys *(LIVE)*	mute the tracks

CELL EFFECTS K3 picks it, K4 sets its value · ARP held: the cell's second effect

ARP arpeggio of a chord, chiptune speed	GLI glides from the previous note	VIB vibrato	ROL the note replayed 2–32 times in the row	BND bends the pitch during the note	CHN chance: plays one time in N
DLY delays the note in the row	CUT cuts the note in the row	REV a break's slice, backwards	PIT ±12 semitones for this note	SHP changes the waveform	CRU crushes the bits of this note
VSL volume slide over the row	PAN pan for this note	OFS starts further into the sample	HOP jumps to row N after this one	END the pattern ends; the song moves on	

MAGIC SCL twice · K1 amount, K2 die, K3 track / pattern

1 CHOPPER: cuts a break again	2 BEAT: a rhythm	3 MELODY in the scale	4 BASS in the scale	5 ARP: arpeggios on the notes	6 EUCLID: N hits, spread evenly
7 VARY: changes the pattern a little	8 ROLLS: at the end of beats	9 ACCENTS	10 DOUBLE: doubles the length	11 SHIFT: by one row	12 CLONE: into a free pattern
13 TRANSP: up one note	14 COPY	15 PASTE	16 CLEAR
